Subject: Catching up

Hi Joe,

I wanted to reach out to you because you're a valued member of the HSE community, and because I'd like to personally invite you to attend the 4C HSE Conference this year.

I hope you'll be able to join me at the conference April 3-5 in San Antonio, Texas where we'll host more than 30 training opportunities, 80+ breakout presentations, and keynotes from David Friedman of AFPM and Ken Garing, formerly of US EPA.

We're also featuring amazing LDAR, BWON, and OGI training classes like:

LDAR Excellence

A 2.5-Day intense dive into best practices, continuous improvement and new-generation technology for all things Leak Detection and Repair / Fugitive Emissions. This workshop will feature discussion on LDAR program revalidation, as well as technology, tools and work practices to help elevate your LDAR program to excellence with cost-effective and efficient opportunities for improvement.

LDAR - Beyond Basics and Underneath the Rules

An in depth look at LDAR Basics from a fresh perspective.

Fugitive Emissions Course

Topics covered: The history of fugitive emissions testing, Terms and definitions, Industry practices and implementation, Types of equipment, Manufacturing process improvements, Packing Manufacturer's Fugitive Emission "Best Available Control Technology (BACT)", Improvements for the future, Problems, installation and maintenance

BWON Auditing for Experts

Ken Garing, Calvin Niss and Steve Probst will provide tips, tools and tricks to successful BWON audits. Topics covered will include commonly missed streams, common violations, recommendations for best management practices and key elements of sustainable programs with a low cost of compliance. Whether your BWON program is in tip top shape, needs a tune up or is a broken down mule, don't miss this opportunity to collaborate and connect with the collective wisdom of these three old timers.

BWON Fundamentals - Implementing a Comprehensive BWON Program

In this full day workshop, Trihydro will show you how to implement a BWON compliance program efficiently and cost effectively. We realize that things change and people change - this training will help those who are just stepping into BWON roles or who have been in their roles for less than 5 years. Our experienced team has assisted over 50 refinery and chemical plants with BWON consent decree compliance, auditing, and program implementation since the inception of the rule in 1992.

Optical Gas Imaging

Offered by FLIR - Infrared Training Center, this course covers the regulatory framework of Method 21 and 0000A and methods of compliance with the use of optical gas imaging. Topics of discussion will include the OGI certification process, how to use the Optical Gas Imaging camera technology and techniques, how optical gas image is a combination of art, science, technique, and interpretive skills, the basic safety practices for doing an OGI inspection, applications and innovative methods of inspection. The Infrared Training Center will be offering a Certificate of Knowledge or Attendance that attendees will be able to use for their personal training files.

Advanced Topics in Quantitative Optical Gas Imaging

This course will review the fundamental aspects of optical gas imaging and describe how they relate to the new OGI related regulations. The OGI related requirements for a 0000a compliant monitoring plan will also be examined. A Quantitative Optical Gas Imaging method will be presented along with results from blind testing and side-by-side comparisons to other quantitative methods. Applications for QOGI in the oil and gas sector will be presented and discussed. The course will conclude with a survey of the latest developments in the field of Optical Gas Imaging with an emphasis on applications for the petroleum and petrochemical industries.

You can check out all our 2018 offerings in the links below:

Presentations - https://www.4cconference.com/2018-presentations?utm_source=sp&utm_medium=email&utm_campaign=isa

Trainings - https://www.4cconference.com/2018-training-courses?utm_source=sp&utm_medium=email&utm_campaign=isa

You can also register for the conference here:

http://www.cvent.com/d/r5q4nv/4w?utm_source=sp&utm_medium=email&utm_campaign=isa

We are constantly looking to improve our presentations and trainings, and your feedback on our content is always appreciated.

Are there any areas that are not being covered that you would find valuable?

You can learn more about the conference and register at www.4cconference.com. Please pass this email along to any of your peers that may be interested in attending, and don't hesitate to reach out to me if I can assist you with registering for the conference and booking your hotel.

Do you think you will be able to join us this year? If not, can you please let me know who at your site would be interested?

I really appreciate your support and hope to see you in April!

Thanks,

Steve Probst, P.E.
